

ECO SERIES DOORS

The Eco Series doors were introduced in 2010 giving you all the same qualities and energy efficiencies as the Advantage Series but with the most popular options added as standard.

CDS's High-Def LED lighting system gives you the ultimate lighting option available. It's color output enhances your product and makes the colors pop. The High-DEF LED has been designed with each fixture having its own internal power supply and an easy plug in connection, eliminating the need for external drivers and complicated wiring.

We have also added the super popular full-length handle to the Eco Series doors. The full-length handle gives the Eco Series door a truly elegant look as it eliminates the standard style pull handle.

The coolers come standard with 2-pane Low-E gas filled glass which gives the Eco Series superior insulation and remarkable performance which exceed DOE energy standards.

Just like the Advantage Series, The Eco Series also come standard with the flat mullion construction, field reversible doors**, 27" deep non-notched shelving and the patented Kwik Level and Kwik Torque System.

The Eco Series is the ultimate in energy efficiency and style!

The Eco Series is available for both coolers and freezers in many standard sizes but can also be made to fit custom openings if required.

Note: CDS is the only door company with serviceable and repairable doors when compared to the low-end throw-away non-serviceable doors offered by other companies.

**additional parts (not supplied) required at time of reversing.

Kwik Torque Design
Makes adjusting tension a snap.
Just 3 to 4 clicks and the door
shuts and seals with ease.

High-DEF LED Lighting Package - Standard.

2 pane glass
3 pane glass

Exclusive Kwik Level Door
Alignment System

Flat Mullion Design - Superior Insulation

Snaps together in seconds
