

HIGH TRAFFIC ENTRANCE DOOR

Hydraulic Closure
Smooth automatic closure with a simple hold open feature that will hold the door open to 90 degrees.

Interior Push Bar

10" Stainless Steel Kick Plate in and out.

FEATURES:

The High Traffic Entrance door is standard with a 2 pane Low E glass package, 10" stainless steel kick plate in and out, an inside push bar, and an energy free door frame. The door sits in an energy efficient frame to make this cooler door EISA compliant. The door frame can be ordered with or without a threshold with no additional cost. The Hydraulic Closure system allows for a soft close to insure a secure tight seal every time. The Hydraulic Closure features an automatic hold open which is preset at the factory to hold the door open simply by opening the door to 90 degrees, then just push the door to release the hold open feature allowing the door to close. High Traffic Entrance doors are available in sizes 30" X 81", 36" X 81" single and double doors.
