

# LEGACY SERIES DOORS

**Kwik Torque Design**  
 Makes adjusting tension a snap.  
 Just 3 to 4 clicks and the door shuts and seals with ease.

The Legacy Series doors were designed to be an elegant workhorse to compete against the industry standard entry-level doors. With decades of experience, the CDS team was able to bring you a door that is cost-effective but exceeds the entry-level expectations.

Since 2003, the Legacy Series has been sought after by thousands of satisfied customers and is used in both low- and high-end establishments due to the look and quality. No longer was it required to purchase the highest level to get such a great product that will last for years at a much lower cost.

Not only is the Legacy Series affordable, but it also offers a T-Mullion design to give it one of the strongest frames in the industry and has been developed to be highly energy efficient. The exclusive hold open was designed to eliminate the industry standard hold open arm which gives the Legacy Series a much cleaner look and is much easier to operate.

The Legacy Series also comes standard with the patented Kwik Level and Kwik torque, allowing the doors to be adjusted without expensive tools. T8 Style LED lighting is also standard on the Legacy, giving even more energy savings and longer life compared to fluorescent lamps.

With standard 27" deep shelving that have full non-notched corners more product is able to be stocked and displayed behind each door giving you more bang for your buck.

The Legacy Series is available for both coolers and freezers in many standard sizes but can also be made to fit custom openings if required.

The Legacy Series has upped the industry standard and brought it to an all-new level!

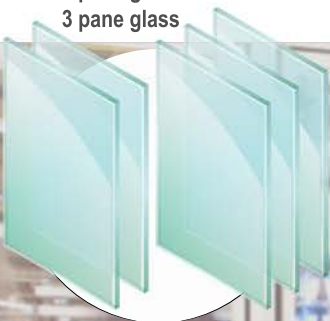

Note: CDS is the only door company with serviceable and repairable doors when compared to the low-end throw-away non-serviceable doors offered by other companies.

Standard T8 LED Lighting Lamp with optional High Definition LED lighting available.

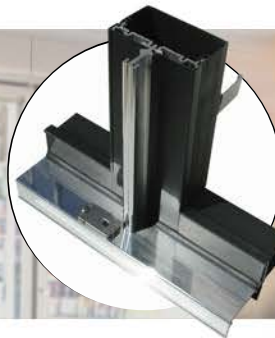

2 pane glass  
 3 pane glass
