

# SLIDER DOORS

NEW  
**THE SLIDER**

Heavy Duty Metal Roller Assembly

Removable Bottom Door Track

The Slider doors were designed to be an option for coolers that don't have room for swing open doors. CDS team was able to bring you a slider door that is cost-effective and comes in a variety of standard sizes with optional custom sizes to fit your needs.

CDS has engineered a sliding door with features that set us apart from the competition. The Slider is standard with an energy free door utilizing a 2 pane Low E gas filled glass package to better resist condensation and keep the heat out and the cold in. The exclusive heavy duty metal rollers (no plastic here) at the bottom of the door make opening and closing the doors absolutely effortless. The Stainless Steel Track system is removable without the use of any tools for cleaning or replacement if necessary. Experience the quality and durability of the CDS Slider on your next project.

Standard T8 LED Lighting Package (Optional)

High-DEF LED Lighting Package (Upgrade)

2 pane glass  
3 pane glass
